Important Information

The published Net Asset Value per share of this sub-fund is calculated by using the values of the underlying stocks as of the close of the prior business day. Therefore, to calculate the monthly performance for the sub-fund we use the published NAV/share of the first business day following the last day of the month. For example, if the last day of the month was a Tuesday, the NAV/share we use to calculate the monthly performances would be Wednesday's published NAV/share as the pricing of the underlying positions is based on the close of the Tuesday. This aligns the performance of the sub-fund with any peer group or indices comparison.
